SMASHING PROPERTY.

Miners at Centralla, Ill., Destroying Ma-

chinery and Throwing it in the Shafts. CENTRALIA, III., May 24.—About 500 strikers from the Duquoin and St. John mines arrived in this city today, on an Illinois Central freight train, and proceeded to the Big Four mine, operated by Pottenger & Davis, in the northern limits of the city. They demolished considerable of the machinery and filled the shaft with about fifteen feet of debris, dump carts and other loose material about the mine.

Every glass and sash in the buildings were smashed. The total damage to the property is estimated at \$2,000. The Big Four mines have for the past three days been running with about thirty men and yesterday they refused to come out at the request of the local committee.

The Duquoin strikers boarded a freight train in this city and forced the engineer Charles Stewart to haul them here Sheriff Helms was notified at Salem, that the men were coming and a special engine sent to convey him here, but he did not arrive in time to save the destruction of the property.

The striking miners held a meeting and left the city on foot for Odin, eight miles north of here, to shut down the mine there.

The sheriff swore in about fifty deputies, who were equipped with Winchesters from the armory here and left for Odin on a special train. The miners were well armed with pistols and plenty

## INDIANA POPULISTS.

State Conventien in Session at Indianap-

olis With 2,000 in Attendance. Indianapolis, May 24.—The Indiana Populists met in state convention in Tomlins' hall this city, at 10 o'clock today. The enthusiasts of the party predicted an attendance of 5,000, but 2,000 is probably the size of the convention. Each precinct of the state is supposed to be represented, which would mean about 1,000 delegates.

Leroy Templeton was made permanent chairman, and a full state ticket will be nominated.

The offices are seeking the men, and there are no really avowed candidates. The platform is practically the same as that adopted at Omaha, and advocates an income tax and postal savings banks. A revision of the emigrant laws is asked, the abolition of convict labor and

the election of the president and vice president and United States senators by a direct vote of the people is de-

## INVESTS IN SILVER.

The President Said to Have Bought An Interest In a Mine.

CRIPPLE CREEK, Colo., May 24.-A half interest in the Caledonia mine has been sold to Willard Ward, S. Z. Dixon and Dr. Ward of New York city. Dr. Ward is a personal and political friend of Grover Cleveland and is said to have represented the president in this

Cessation of Silver Mining Will Stimulate Gold Productions.

But the Gold Supply Will Still Prove Inadequate.

#### GOLD IN WASHINGTON.

State's Products.

Washington, May 24 .- [Special.] -The department officials who deal with figures on the precious metals are making diligent efforts to get at the exact facts to supply the ever increasing demand of con-gressional resolutions and individual congressmen for knowledge. They are inclined to optimistic views on gold production, and it may be said generally that just at present there is an apparently concerted attempt to convince mankind that there is a lavish abundance of gold, and that within reach. The views of every one from the 25 lbs. extra C Sugar..... 1 00 mining regions are sought, and congressmen from those regions, as might be expected, give somewhat contradictory though very interesting accounts.

Congressman Sweet's Opinion. Mr. Sweet of Idaho, in a brief talk on the subject, said: "Idaho's gold output has been about \$3,000,000 per year, and undoubtedly the dessation of silver mining will stimulate the production of gold for a little while. The men thrown out of work in silver will prospect thoroughly, and many will work talings and low grade placers which they would not have worked a few years ago, because they must do something and can at least make a living at that till a better prospect opens. But on one point I am well satisfied—that all the increase of gold thus caused will not make up, or at any rate more than make

up, for the loss caused by stopping the mining in those silver ores which contain both silver and gold. It is too often forgotten that a very large part of our gold comes out of nominally silver ore. Stop producing the silver and you stop produc-ing the gold. Such is the opinion of the best posted men in Idaho, and I am satisfled it is true. It is very plain to me that there can be no great increase in the world's supply of gold, and that in a few years the entire annual output will be consumed in arts and ornaments. Gold is steadily growing more valuable, and as it does so the wealthy will use still more for ornaments. I know that wonderful stories are told about South Africa, and every few

about the same old amount produced."

Gold In Washington.

this and adds a few more suggestions. He

be a considerable revival of placer mining, and that some lodes will be worked which

would not have paid a few years ago be-

men must work at something, but the in-

crease thereby in the long run will no

the cessation of silver mining. Mr. Doo-

little of Washington says: "Gold does not

rank high among the productions of our

in grain, lumber, fish, coal, almost every-

thing, in fact, that the amount of gold pro-

duced in some mining states would seem

to us too small an item to think much of,

and so I do not remember the amount. It

is a fact, however, that in many sections

of Washington there is great activity in

gold mining of late. They are putting in all sorts of new and ingenious appliances

on the river bars for collecting the fine

gold, and the new processes of reduction

will make the work more economical. Still

silver mining will not permanently aid gold mining. The two pursuits must be harmonious. The gold supply will in-

crease, of course, but I have no facts lead-

ing me to think that the increase will be

must go on for some time yet."

very great, nor do I just now remember

Senator Jones' View.

and Newlands of Nevada are much more

radical in favor of silver, but neither pro-

fesses to have any special knowledge as to

a possible increase in the gold supply.

hopeful views on the prospect and gives

specifications to show that the increase in

Colorado will be considerable this year.

At the mint the opinion is entertained that

the yield of that state may even reach \$20,

000,000 per annum before long. Senator

Jones has nothing to add to his speech on

the repeal bill last October, which is the

great cyclopedia from which silverites now

draw their statistics and arguments. He

says, however, that as a practical man he

is trying to exploit gold mines because the

world is now willing to pay high for gold.

cial question is chiefly discussed are pretty

well supplied with documents from for-

eign sources in which much is made of the

wonderful prospects in South Africa, one

report going so far as to say that in the

great Wittwatersrand district there are ris-

gold bearing quartz, as shown by govern-ment borings, and that there is certainly

gold enough there and easily obtainable to

supply the civilized world with \$1,000 per

capita. At all this Senator Jones sniffs

contemptuously and says it is simply the work of London and South African papers,

which are booming the stock of the min-

ing companies. As a matter of fact, the

yield of all Africa south of the equator has

not yet exceeded \$8,000,000 per year. The

figures are tedious-too tedious perhaps

for a dispatch like this-but the subject

whole country will soon be invited to con-

sider it, and every scrap of information,

as well as the views of those best in-

The Bribery Charges,

So far as there is any expression of feel-

ing on the wholesale charges of bribery

against senators it is of disgust and con-tempt. No one believes that either Sena-

tor Kyle, Hunton or anybody else would

listen to a proposition to sell a vote for

money, but back of this there is a real

question between the two parties, each al-

leging that the story was started by the other to bring outside influence to bear

upon the senate, and that is really what

formed, is eagerly sought for.

#### HAS HILL GIVEN IN?

Senator Gorman Said All Democrats Would Support Tariff Bill. WASHINGTON, May 24.—Senator Gor-

more than make up for the decrease due to | man's practical assurance in his speech yesterday that the Democratic party in the senate was now united in support of the tariff bill has led to a renewal of speculation as to the attitude of Senator Hill. There is a difference of opinion as to whether Mr. Gorman meant to include Senator Hill on the list of supporters or to create the impression that the bill would have the support of the Democratic majority without Hill's assistance; but it is considered probable by those high in the councils of the Maryland senator that he had assurance that the bill would have the support of Mr. Hill when the final test should come.

Mr. Hill has said since his return from I am satisfied that the discouragement of New York that he would not offer any opposition to the tariff features of the ill, which is taken to mean that while he is still unreconciled to the income tax, he is disposed to accept the other parts of the bill as the best obtainable and concentrate his opposition upon the

any one in Washington who thinks that the demonetization of silver can be made Members of the finance committee up by an increase in the gold product. It say that this provision will be retained seems to me that .the depression in agriat all hazards, and they are beginning to think that Mr. Hill will accept the bill culture and the general decline in prices in the end with this provision in its mod-The views of Messrs. Pence of Colorado

Mr Hill yesterday voted against laying the bill on the table but that vote was without special significance except that it indicated that the New York senator thought that the effort to secure tariff legislation should not be abandoned. When asked whether he cared to say anything apropos of Mr. Gorman's speech Mr. Hill replied that he did not desire to talk about it at all.

#### WITH NON-UNION MINERS. Mines at Cripple Creek To Be Opened

Under Protection of Armed Men. DENVER, May 24 .- Within a few days both the Florence & Cripple Creek and the Midland Terminal railroads will be completed to Cripple Creek and it is understood the owners of the large mines, closed since February 1 on account of a strike, will undertake to operate their property with non-union miners.

A force of 300 deputies, many of them ex-policemen, is being organized in Denver and Colorado Springs to protect the men who chose to work on the terms of-

fered by the mine owners. Winchesters and 10,000 rounds of ammunition have been bought in this city for the use of these guards. As the strikers have built fortifications at the summit of Bull Hill commanding the entrances to the principal mines as Cripple Creek, there is likely to be bloodshed when the mines are reopened.

A few of the attractions to be given by the Fraternal Aid associations at Hamilton hall Friday and Saturday, May 25 and 26: The Quaker dance by Misses Leora Strahl, Bella Watts and Lillian Pierson will assuredly be one of the many attractive novelties of the dancing carnival at Hamilton hall Friday and Saturday evenings.

If you want a good hearty laugh you should hear Edna Davidson and Lillie Wilson in the new song "Shootin' Craps, in which Patti Rosa made a decided hit wherever she appeared this season. We can't have Patti Rosa with us, but we know that Edna and Lillie will please At Hamilton hall Friday and Sat-

urday evenings. D. Holmes, druggist, 731 Kansas ave.

pensed with many needless offices and effected valuable reforms. "The thing that hurts," he says, "is the abolition of somany sinecures. There were many positions where the pay was good and the service very light." Winfield's New Creamery is Now in Running Order.

It is the Largest One West of St. Louis,

#### OTHER STATE NEWS.

State University to Send Out a Geological Expedition.

Winfield, May 24.—Winfield's new creamery has been completed. There are over 500 creameries in Kansas but this is the largest west of St. Louis, the next largest being at Abilene. The building is 48x60 and is frost proof.

The main room where the churning is done, is 48x32 feet. In this room are four large vats of six hundred gallons capacity each, and four large churns of ur hundred gallons each, together with

tanks, troughs, piping and machinery necessary to run the business.

The process of butter making is to temper the milk in the large six hundred gallon vats, which is done by a process of water and steam. When the cream is ready for the churn it is conducted to the large four hundred gallon churn by piping.

The capacity is ten thousand pounds per day and as the average quality of milk will make four pounds of butter to the hundred pounds of milk, this will furnish a market for twenty-five hundred pounds of milk daily, and is a grand thing for the farmers and dairymen.

#### WHAT FT. RILEY COST.

Prof. Smith stated that he proposed only to argue six of the grounds of appeal instead of twelve. The Government Has Expended Nearly \$1,000,000 In Fitting It Up.

JUNCTION CITY, May 24 .- The official figures show that the total expenditures in the rebuilding of Ft, Riley up to date. to fit the post for its present use as a United States cavalry and light artillery school, approximate closely the sum of one million dollars, (\$1,000,000). The expenditures in the post quarter-master's department for the fiscal year records of the original trial proved that the judiciary was prejudiced in that it allowed members of the body to sit in the

ending June 30, 1893, on account of purchases, construction, repairs, civil employes, etc., aggregate \$121,332. Since that time up to the end of March, 1894, on these same accounts, \$71,269 have been expended.

spiration and independent of it. It was further shown that the doctrine of iner-The civil employes' pay roll amounts to almost \$2,000 per month, not including the "extra duty" pay roll, which varies considerably, but averages about \$200 per month. The military pay roll foots up about ten times that of the civil, or \$20,000 per month, about equally divided between, say, forty-five commis-sioned officers and 750 enlisted men.

The coal used last year cost \$19,800. This year it will cost a couple of thousand more, because of a better grade being consumed.

## ALAS, THE POTATO CROP

In the Vicinity of Lawrence the Damage Is Very Great. LAWRENCE, May 24.—The potato crop

of the Kaw valley in this vicinity is reduced one-half by the recent frosts. Inquiry shows that all the way from Williamstown and Edwardsville and even further down along the Kaw the frost had done damage. Some entire fields were devastated and others only in part. One farmer who lives north of the city estimates that 500 acres of potatoes within two miles of the city were injured, and that 350 of these were destroved so that only small and unmarket-

able potatoes will grow upon the vines. In many of the fields the farmers went out and began the planting of corn, believing that they might get something out of the land in that way, even if the potato crop was lost.

The Kaw valley farmers have reduced the acreage of potatoes one-half since last Sunday morning. Between Eudora and Lawrence there was something near 1,300 acres in potatoes, now there is 650 all told. This frost with the price that follows will check the rush for potatoes another year and send them elsewhere after crops.

## BABY RUTH NOT BRIGHT.

The Arkansas City "Traveler" Explains Its Story About the President's Child. ARKANSAS CITY, May 24.—The Traveler, which some time ago published a statement that Baby Ruth, the eldest child of President and Mrs. Cleveland, was a deaf mute, has the following to say in corroboration and explanation of the story:

The day following the publication of the report in the Traveler, telegrams and letters began to pour in from the cities named, asking for all the information at our command. The desired information was given, and a searching investigation in the east by newsgatherers, shows that what was stated in these columns at that time is unfortunately too true. In evidence of this is given below a statement of the facts received from Washington and from sympathizing friends of the president and his wife:

Baby Ruth is not wholly deaf and dumb, but the tender little girl has not been blessed by nature with all the talents which render life enjoyable and bright. Everything that science and skill can do for her is being done.

#### GOING TO THE BAD LANDS. A Geological Excursion to Start in June

From the State University.

LAWRENCE, May 24-During the first week in June Dr. S. W. Williston and the list of student assistants given below will go to the Bad Lands in Dakota on a geological expedition. They will be gone all summer, and when they return in the fall expect to have a big collection of valuable fossils, which will be added to the University museum and used for exchange purposes.

Following is a list of those who will accompany Dr. Williston: E. C. Case, E. S. Riggs, B. H. Hill, B. Brown, B. M. Dickinson and T. R. Overton.

## WOULDN'T QUIT WORK.

The Missouri Strikers Had No Effect on the Weir City Miners.

GIRARD, May 24 .- The Missouri miners have vacated Pittsburg and marched to Chicopee. Only a few of the miners at that place worked, but part of them laid off on account of the death of Guy Haney near Weir City. The Missourians then moved on to Weir City and held a meeting with the men at stafts 47 and 48. After some discussion a vote was taken 1 70; Cordage, 24,

Highest of all in Leavening Power.-Latest U. S. Gov't Report.

ABSOLUTELY PURE

by the Weir miners, and they almost un-animously favored continuing at work. The visitors then marched to the city but they are not meeting with as much success at that place as they did in the vicinity of Pittsburg. It is reported that another delegation is en route from Mis-souri to join the crowd already in this

Guilty of Manslaughter. ABILENE, May 24.—In the Lang mur-der case which has been on trial her for the great part of a week, the jury re-turned a verdict of manslaughter in the fourth degree, defined as "the involuntary killing of another by a weapon or by means neither cruel nor unusual, in the heat of passion in any cases other than justifiable homicide." The punishment is six months in jail to two years in pris-on. The verdict is considered a victory for the prosecution.

Wichita's Auditorium. WICHITA, May 24. - Workmen are busy day and night on the new auditorium building, and it is being pushed toward completion as rapidly as men and money can do it. On Friday of this week the Traveling Men's convention convenes in this city, and they will want to occupy

this building. Chinch Bug Report Out. LAWRENCE, May 24-The annual report of the University experiment station for the extermination of chinch bugs, is out. It makes a pamphlet of 278 pages and contains the result of the last year's work. The reports will be mailed for distribu-
